

1 January 2018

To: Leighton Electronics Customers, Suppliers,
and Distribution Partners

Subject: Acquisition of Leighton Electronics

Dear Valued Partners,

We are pleased to announce that effective 1 January 2018 Semilab Zrt has acquired the assets of Leighton Electronics, Inc. (LEI), a Pennsylvania based manufacturer of semiconductor metrology equipment.

Under the terms of the Asset Purchase Agreement, Semilab has acquired all technology rights relating to LEI's technology. Products and services will continue to be available through the same Leighton engineering team and location as before, although all new purchase orders will be managed via Semilab's USA subsidiary:

Semilab USA, LLC
10770 N. 46th St, E700
Tampa, FL, 33617

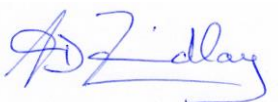

We will be carrying out an urgent review of our overall sales distribution and support structure. This will be carried out as speedily as possible. Whilst this review takes place we ask that both Semilab and LEI sales partners continue their sales activities.

We are pleased to confirm that 12 previous Leighton employees have joined Semilab USA. Although formally under the purchase agreement we do not take legal responsibility for the past LEI installed base, Semilab will make best efforts to maintain supply of spare parts, and where possible may also quote field service support. All such support will be provided on a best endeavor basis.

On behalf of Semilab I would like to thank you for the opportunity to continue to do business with you.

Further information will be communicated as it becomes available. In case of any urgent requests, please contact Semilab Zrt at sales.support@semilab.hu, or myself at afindlay@semilabsdi.com. Thank you.

Yours sincerely
For and on behalf of Semilab Zrt.

A handwritten signature in blue ink that reads "A Findlay".

Andrew Findlay
President Semilab USA
Director of Semilab Global Sales
